

# COSMIC Psychiatry

– *Complete support for healthcare staff in psychiatry*

COSMIC Psychiatry provides customised support covering all major areas within psychiatric healthcare, taking into account the special demands, regulations and laws that compulsory psychiatric care is characterised by. COSMIC Psychiatry is an integral part of Cambio COSMIC which offers modules such as referral, order management, medical records, medication and much more.

## FOR ALL HEALTHCARE FORMS

COSMIC Psychiatry contains the mental health care forms required to document and monitor a patient's behaviour, risks and needs within inpatient and outpatient care. These mental health forms allow COSMIC Psychiatry users to make informed decisions and provide the best quality of care.

- Handling activities that are specific for psychiatry, both obligatory activities and activities that need to be carried out when necessary.
- Handling the different forms of healthcare such as compulsory psychiatric care and forensic psychiatric care.
- Handling medical certificates.
- Specific psychiatric medical records view – a clear customised medical records view adapted to the needs of staff at the psychiatric unit.

## A NEW WAY OF WORKING

COSMIC Psychiatry integrates several central functions within Cambio COSMIC, with two new functions for psychiatric care: *Activity support* and *Psychiatry* view in the medical records.

## ACTIVITY SUPPORT

*Activity support* – is the very heart of COSMIC Psychiatry. This supports the important administrative psychiatric care work. This is where compul-

sory measures and monitoring are registered, for example, when a decision on whether to extend the length of care has to be made.

The activities that are presented form part of the activity plans – which include activities that must or can be carried out for a patient. The activities that will be included in an activity plan are determined by the staff along with the system administrator. The relevant activity plans are linked automatically to the patient.

The activity support is used to monitor and document these activities. The content can be presented in different ways depending on the users' log-in.

## MANAGING PSYCHIATRIC HEALTHCARE FORMS

In order to meet the needs of psychiatric wards, we have created a link in COSMIC between the patient and the healthcare form that they will be treated under. The choice of healthcare form will determine what activity plans will be activated. COSMIC Psychiatry also offers full support for handling medical certificates and making work procedures easier in psychiatric care.

## FOR EVERYONE IN PSYCHIATRY

COSMIC Psychiatry is a versatile and

powerful support for several different staff groups within psychiatry – doctors, nurses, receptionists, medical secretaries, etc.; everyone can gain great benefit from the adaptability and efficiency that are key features of COSMIC Psychiatry. You will quickly notice that many of the jobs that you and your colleagues have to do will require less time and attention. You can spend more time on your patients and less time in front of piles of papers and forms.

### THIS IS HOW I USE COSMIC PSYCHIATRY:

- As a doctor, it's important to manage my patients' activities, what I need to do next – for example, make decisions on extended compulsory care.
- As a medical secretary, I want to see the activities for all patients on the ward, or specifically for one patient when I need to.
- As a nurse I want to be able to follow the activities of one specific patient.
